UTT Launches uSTART

T&T's first Business Incubator Facility

On Wednesday, 17th September, 2014, The University of Trinidad and Tobago (UTT) made history with the Launch of "uSTART": the first University-originated Business Incubator facility in the nation. Defined as "an organisation designed to accelerate the growth and success of entrepreneurial companies through an array of business support resources and services", business incubators emerged in the US during the 1950's and continue to be popular today given the high importance of business creation to the global economy.

Indeed, uSTART serves as a vehicle toward achieving UTT's entrepreneurial mission of functioning as an engine of innovation and enterprise, as it seeks to foster an ecosystem that supports entrepreneurial mindsets in both staff and students. The incubators cover four (4) overarching areas of Animation, Performing Arts, Agro-Processing and Fashion, areas with which the University is already associated via its academic offerings. The Launch therefore provides UTT with a platform to support the work being done by its students, faculty and graduates and further encourages these initiatives which lead to wealth generation and job creation.

Continued on page 2

Featured Panelists: The evening's main speakers consisted of a panel comprising Senator the Honourable Fazal Karim, Minister of Tertiary Education and Skills Training (2nd from left), Mr. Curtis R. Manchoon, Chairman, UTT (2nd from right), Mr. Robert Tang Yuk, Managing Director, TYE Manufacturing Company Ltd. (left) and Ms. Anna White, UTT Fashion graduate and entrepreneur (right).

Special Award: Professor Dyer Narinesingh, President, UTT, presents the "President's Award for the Top Entrepreneur 2014" to designer Adrian Foster, graduate of UTT's Caribbean Academy of Fashion and Design (CAFD).

The Launch featured a panel discussion as its main event, which comprised of Senator the Honourable Fazal Karim, Minister of Tertiary Education and Skills Training, Mr. Curtis R. Manchoon, Chairman, UTT, Mr. Robert Tang Yuk, Managing Director, TYE Manufacturing Company Ltd. and Ms. Anna White, UTT Fashion graduate and entrepreneur. Minister Karim referred to business start-ups as one of the "learning outcomes" desired from the government's investment into tertiary education. Furthermore, he emphasised the need for "guided growth and development" of new businesses, which the incubators would provide in significant and substantial ways. The Minister also announced the transition of the On-the-Job Training (OJT) programme into "OJT sectoral", whereby persons will be placed into areas along specific lines of work, one of which is to include Entrepreneurship. He further reiterated his Ministry's commitment to the emerging workforce, stating that "as young people pursue opportunities, we must provide them with access".

Mr. Manchoon outlined the University's Mission as that of an Entrepreneurial University and expressed his pleasure that UTT was indeed fulfilling this purpose. He noted that the Launch signaled a proud day for the institution and for the nation at large, referencing the 2015 National Budget Statement that highlighted the need for diversification of the economy and the fact that uSTART would certainly play an important part in this respect.

Mr. Tang Yuk and Ms. White spoke in their respective capacities as a "seasoned entrepreneur" and a "graduate entrepreneur". As Managing Director of TYE Manufacturing Company Ltd., Mr. Tang Yuk commended UTT for a "fantastic programme" and pledged his assistance to the initiative, offering strategic advice which stemmed from his own extensive experience. Ms. White, a graduate of UTT's Caribbean Academy of Fashion and Design (CAFD), outlined her own difficulties in starting her fashion business, one of which included the selling of her car in order to showcase at an international fashion show. She has been offered three (3) international contracts thus far and as one of the uSTART incubatees, looks forward to the assistance provided by UTT.

The ceremony also contained a graduation aspect, which sought to recognise those who have been impacted by the entrepreneurial climate of the University and who have created their own businesses. The University continues to support the endeavours of its affiliates and in so doing, lend to the economic growth and prosperity of Trinidad and Tobago.

On visit: Representatives of IChemE along with academic staff of UTT's Process Engineering programmes and Dr. Fazal Ali, Provost, UTT (3rd from left) at the re-accreditation exercise.

UTT's Process Engineering Programmes Re-Accredited with IChemE

The Institution of Chemical Engineering (IChemE), a UK based chemical engineering society, visited UTT's Point Lisas campus from July 16th – 18th, 2014 to re-accredit the National Engineering Technician Diploma (NETD) in Chemical Engineering, Bachelor of Applied Science (BASc.) in Process Engineering and Master of Engineering (MEng) in Process Engineering degrees. On September 18th, IChemE re-accredited all of the following programmes:

1. NETD Chemical Engineering accredited at the Diploma level
2. BASc Process Engineering accredited at the Bachelor's level
3. MEng Process Engineering accredited at the Master's level

Each programme was re-accredited for five (5) years, the maximum time granted by IChemE. Special thanks to all throughout the UTT community who contributed toward this achievement.

UTT TALKS

UTT Responds to the 2015 National Budget

Prepared to present: Panalists await their cue from the Mistress of Ceremonies to share on the impact of the National Budget 2015 with respect to their particular areas of expertise.

The University of Trinidad and Tobago (UTT) hosted its third annual "Response to the National Budget" on Friday 19th September, 2014 at Theatre 1, UTT Campus at NAPA, Port-of-Spain. As the National University, UTT sought to explore the impact of the $64.664billion dollar budget for the fiscal year 2015 on the diversification of the economy toward sustainable development. The Response focused on key areas of: Education and Training, Health Administration, Transport, the Environment, Energy and Sport.

The event took the form of a distinguished panel, with panelists discussing key areas critical to national development. The areas addressed included: Education by UTT's Senior Vice President and Provost, Dr. Fazal Ali; Health Administration by Mr. Idi Stewart, student of UTT's Master's in Health Administration programme; Transport by Mr. Adrian Beharry, Senior Instructor attached to UTT's Maritime programmes; Environment by Professor Valerie Stoute, Programme Professor, Environment programme; Security and Public Order by Dr. Meredith Patten, Interim Programme Leader and Associate Professor at UTT's Institute for Criminology and Public Safety; Energy by Mr. Neal Alleyne, Programme Leader of UTT's Petroleum programmes; Information and Communication Technology (ICT) by Professor Rodney Rambally, Programme Professor, ICT and Sports which was discussed by Senior Manager, Sport and Recreation and noted sportsman Daren Ganga. Addressing the audience, from the student perspective, was Kendel Jaggernauth, Executive President of the UTT Student Guild.

UTT President Professor Dyer Narinesingh delivered the closing remarks where he confirmed that UTT was indeed focusing on "nurturing minds and changing lives through education and skills training". He further urged students to view education as a continuous journey and encouraged them to, "continue the dialogue with their colleagues."

Rapt Attention: Students listen attentively to the discussions at the event.

Spreading the Word: Professor Sugata Mitra addresses the audience at "The Future of Learning through Technology".

Leveraging Mobile Learning in the Classroom- The UTT Perspective

Professor Sugata Mitra, a Professor of Educational Technology at the School of Education, Communication and Language Sciences at Newcastle University, UK, is credited with more than twenty – five (25) inventions in the area of cognitive science and educational technology. He rose to mainstream popularity with his mastermind Hole in the Wall (HIW) experiment, in the year 1999. The experiment surrounded a computer being embedded within a wall in an Indian slum at Kalkaji, Delhi and which children were allowed to freely use. He further coined the term 'Minimally Invasive Education (MIE)' which described the experiment's outcome as children were able to be easily taught the rudiments of computer usage without any formal training.

On Wednesday 3rd, September, 2014 he, along with his associate Catherine Ellis, FRSA (Fellow of the Royal Society of Arts), participated in an information session led by UTT titled, "Leveraging Mobile Learning in the Classroom" at The Hilton Trinidad Hotel and Conference Centre, Port-of-Spain. This session, which used a "Ted talks" format, showcased presentations by UTT's academics on various topics which included Enhancing the Educational Experience Using Mobile Technology and Social Media, The Flat Classroom, Teaching the Teacher Technology, The Learning School and Mobile Technology and Research. With the rise of internet dependency, significant studies have begun on the impact of mobile technology and the way research is being conducted. UTT's Professor Valerie Stoute's in-depth presentation on this new approach to research was well received by the audience as it presented a sterling academic contribution to this wide debate.

Techno Talk: Professor Valerie Stoute appeals to the crowd and uses a cellular phone as a prop to further explain her point as she presents on Mobile Technology and Research

Orientation

The Future of UTT: Students gather at the UTT O'Meara Graduation Pavilion for the formal Induction Ceremony. Camaraderie and teamwork were later fostered at the "Freshman Games", where the new students participated in fun activities for a great start to the new semester.

Dr. Letitia Williams

Dr. Letitia Williams

has been an educator for her entire professional career. For the past 14 years, she served in a variety of academic and student affairs positions in the United States. Prior to her higher education experience obtained overseas, she was a primary and then secondary school teacher in Trinidad and Tobago. She now serves as the Assistant Vice President (AVP) Student Support Services at The University of Trinidad and Tobago.

The following is an interview with the new AVP- Student Services:

What exactly is the role of Student Support Services in relation to the student population at UTT?

Student Support Services (SSS) fosters student self-discovery and learning and enhances the educational experience through co-curricular personal and academic support programmes and services; opportunities for student engagement and leadership and a range of experiences that foster students' personal, academic and professional skills which help to prepare them to contribute to Trinidad and Tobago, the region and the world. Our programmes and services are provided by exemplary and experienced staff in a variety of units and focus areas: career development, civic and community engagement, student counseling, disability services, housing and residence life, personal enhancement and student development.

Part of UTT's mission statement includes "enhancement of the quality of life of all individuals, families and communities of the Republic of Trinidad and Tobago and the Caribbean." How do you see your department contributing to this mission?

Student Support Services is central to this mission. Staff all work within a community-minded framework. First, SSS staff recognises that the old adage "it takes a village" continues to hold true at the tertiary level and that students are in a great sense the products of their communities. As such, in providing support to students it is often necessary to reach out to families. For example, at the recent UTT New Student Orientation, family sessions were an integral element serving to make families aware of how to support their university student, and to highlight the possibilities for their own educational advancement. Student Support Services also has a unit that focuses specifically on students' civic and community engagement. As a result of these efforts, student volunteerism is on the rise and a number of community partnerships have been sustained creating significant impact on the lives of persons in the community. This year the goal is to develop campus signature projects that are authentic and relevant in that they will be collaboratively designed so as to reflect both the identity of the campus and meet needs specific to each campus' fence line communities.

Campus Life is very essential to a holistic University experience. How would you describe Campus Life at UTT? How do you intend to maintain or improve this?

I am so glad that you have raised the issue of a holistic University experience because students who are involved in campus activities have been shown to have stronger support networks, which fosters academic success, retention and completion, and they are generally more satisfied with their university experience. UTT students start and join student organisations and clubs, participate in sports leagues and contribute to leadership of the university through the student executive and chapter guilds. Student Support Services provides organisational and administrative guidance and facilitates training though the Student Development Unit. All units also develop a range of programmes and workshops for students.

Your department's mandate includes providing services and support for all students at the institution. Are there provisions made for differently-abled students attending the University?

This is yet another area where we are making significant strides. The University has enrolled several students with disabilities ranging from hearing and visual impairment to learning disabilities. Through the Disability Services Unit we provide services ranging from sign language interpretation, note taking and facilitating examination accommodations to advocacy and referrals. As a result of this support several students have been able to complete their programmes and are successful graduates of UTT. This unit also works with faculty to raise awareness of the students with disabilities, of their right to service, and how faculty can provide reasonable accommodations to support these students' learning.

What are your future plans for Student Support Services?

Wow. As a department we have several things we would like to develop, some of which I have already mentioned. One of the big issues is how to address financial need. We have students who, despite tuition coverage, are challenged to provide the basics such as transportation and meals, all necessary to be successful at university. I would really like to see us develop mechanisms and programmes for providing financial aid to students in need. In addition, we would like to build closer relationships with academics so that we can more effectively provide support to students.

Mr. Phillip Robinson, Registrar

UTT's Registry – Making Students our #1 Priority

The Mission of UTT's Registry is to facilitate the "Creation of a superior student experience through the provision of student-centered customer service in an environment that respects confidentiality, demonstrates reliability and upholds the academic integrity of the University." The Registry, which is headed by the Registrar, Mr. Phillip Robinson, consists of four (4) Units:

- Student Recruitment
- Admissions
- Student Records
- Examinations

Currently, there are mini-registries located at six (6) UTT campuses which serve ten (10) teaching locations. Registry services play a vital and pivotal role in bridging the gap between administration/faculty and the student body. The academic and student support activities constitute the core business of any tertiary institution, with all divisions/departments established as interrelated entities to satisfy students' needs. As such, the Registry is committed to its role of fostering a harmonious learning environment within the University community and continues to seek the highest interest of UTT's most valuable stakeholders- the students.

Ready to serve (from left to right): Executive Student Guild President - Mr. Kendel Jaggernauth, Vice-President- Ms. Avalon Camille Mondesir, Public Relations Officer - Mr. Andre Ayres, Treasurer/Secretary - Ms. Netfa Fortune and the Post-Graduate Representative - Mrs. Himawatee Baboolal.

Introducing the new UTT Executive Student Guild

UTT's Student Guild is the voice of the student population and represents students on matters which may require a collective and immediate response. The structure of the Student Guild is reflective of the University's multi-campus presence as each teaching campus is represented by an elected Guild Chapter. Officers of Guild Chapters are entrusted with the task of electing, among themselves, an Executive Guild. The Executive Guild has administrative responsibility for organising events, coordinating and arbitrating among Chapter Guilds, overall financial responsibility for all Guild fees, sponsorship of initiatives for the benefit of the student body and, perhaps most importantly, the Executive Guild acts as the facilitator and arbitrator for the student body and the general UTT administration.

Recently, a new Executive Student Guild was sworn in to serve the University's diverse student body. Being a part of the Student Guild is just one of the ways in which students can get involved in campus life. These relationships invariably are important to the holistic university experience and often extend long after students have graduated.

Celebrating World Maritime Day

UTT recognises the importance of its role in creating a positive, long-term impact within the local maritime industry towards the development of Trinidad and Tobago's economy and maritime environment. The Government of the Republic of Trinidad and Tobago (GORTT) has targeted the development of three sub-sectors in the Maritime industry for development, namely: ship ownership, ship building and maritime construction.

On September 8, 2014, Minister of Finance and the Economy, Senator the Honourable Larry Howai, announced in the 2015 Budget Statement the Government's intention to "strengthen this industry by introducing at The University of Trinidad and Tobago (UTT) advanced training for yacht building and maintenance". The evolution of world trade and sea transport is especially important to ship-building demand and UTT will play a significant role in building this burgeoning industry with the advent of practical and theoretical training for Officers of the Watch (Navigation and Radar).

In celebration of World Maritime Day, UTT hosted the annual "Maritime Stakeholder Forum" at its Chaguaramas Campus. The theme of the 2014 World Maritime Day - IMO Conventions: Effective Implementation – was discussed along with other subject matters pertinent to the maritime industry. Key industry personnel, including: Mr Colin Young, IMO Regional Adviser, Mr. E. Ashley Taylor - Chairman of the Maritime Industry Development Committee, Ministry of Trade, Industry, Investment and Communications and Ms. Beverly Phillips, Director of Maritime Services, Maritime Services Division (MSD), Ministry of Transport along with UTT's President, Professor Dyer Narinesingh and academics of UTT's Maritime programmes, were on hand to address representatives at the Forum.

FOCUS ON FACULTY

Professor Rodney Rambally, Programme Professor ICT

Professor Rambally has been involved in tertiary-level teaching, research and consulting for the past forty (40) years. A great portion of this time was spent in Saskatchewan, Canada, where he served as the Head of Computer Information Systems at the Saskatchewan Institute of Applied Science and Technology and as an Adjunct Professor at The University of Regina. Professor Rambally joined the staff of the Trinidad and Tobago Institute of Technology (TTIT), the forerunner of The University of Trinidad and Tobago (UTT), as the Programme Coordinator of IT in 2000. He currently serves as Programme Professor of Information and Communication Technology (ICT) at UTT.

In addition to instructing various courses, Professor Rambally is actively involved with research activities. His research currently focuses on integration of Computational Thinking in Mathematics curricula.

Professor Rodney Rambally

New York Institute of Finance to Boost Capital Markets Education in Trinidad and Tobago

The University of Trinidad and Tobago (UTT), the Trinidad and Tobago International Financial Centre (Trinidad and Tobago IFC) and the New York Institute of Finance (NYIF) have partnered to boost financial education in Trinidad and Tobago in a drive to see the nation develop into a regional financial centre.

As the National University, UTT is concerned with the development of a highly trained and qualified technological manpower base and for this reason UTT was the institution of choice to implement this programme. The Trinidad and Tobago IFC, in a similar manner, is established to build a strong financial services industry by attracting foreign direct investment in the sector and by creating sustainable employment. As part of this mandate, the company is investing in educational resourcing to equip the next generation of leaders with best-in-class, outsourced educational opportunities.

The NYIF is internationally recognised as one of America's oldest and most prestigious financial services educational providers, and will work with the Trinidad and Tobago IFC later this year to provide courses on a range of financial markets through UTT. This will give current university students and recent graduates the opportunity to learn from some of NYIF's faculty consisting of some of America's most preeminent experts in their fields, including Claudia Crowley- former CEO of NYSE Regulation and leading author and educator- John Palicka.

According to Varun Maharaj, CEO, Trinidad and Tobago IFC, the partnership will assist in expanding the skill set of the country's growing pool of world-class, financial services professionals, with modules to be offered on topics and issues not currently available in the nation. UTT's President, Professor Dyer Narinesingh noted that the partnership "seeks to fill a significant gap in local training" through which "we hope to establish our nation in the international financial arena, with great promise of further development".

All in a row: (Left to Right) Varun Maharaj, CEO Trinidad and Tobago IFC; John McGonegal, Global Head of Sales, NYIF; Peter Clarke, Director, Trinidad & Tobago IFC; Jamal Mohammed, Technical Advisor to Minister of Tertiary Education and Skills Training; Professor Dyer Narinesingh, President, UTT.

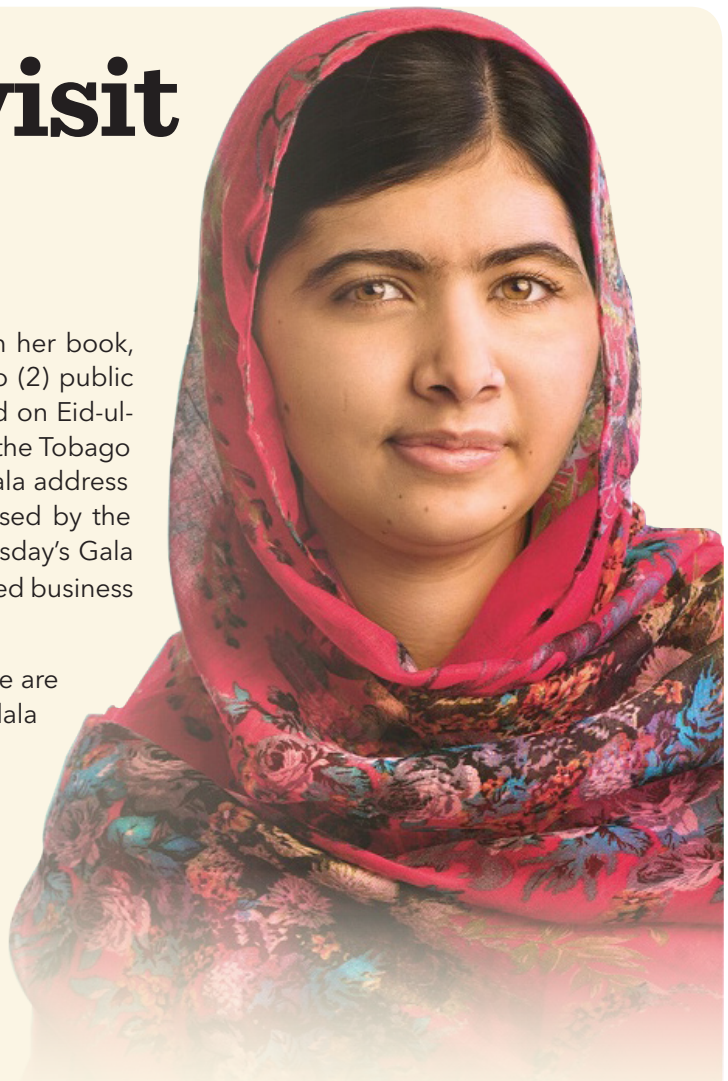
Highlights of Malala's visit to Trinidad and Tobago



Malala Yousafzai, the seventeen year old global education activist, whose cause is synopsised in her book, *I Am Malala*, visited Trinidad and Tobago from 27th July- 1st August, 2014. Malala spoke at two (2) public engagements on the 30th & 31st July, 2014, met with children of several homes in south Trinidad on Eid-ul-Fitr and visited Tobago on a courtesy call to The Honourable Orville D. London, Chief Secretary of the Tobago House of Assembly (THA). The first event, geared toward a more youthful demographic, saw Malala address an audience comprised of primary, secondary and tertiary-level students. The event was endorsed by the Ministry of Education in addition to the Ministry of Tertiary Education and Skills Training. At Thursday's Gala event, 'An Evening with Malala', the guest of honour spoke to a diverse audience of leaders and noted business professionals in society.

On behalf of the Chairman and Members of the Board of Governors, Students and Staff of UTT, we are extremely honoured to have hosted this extraordinary advocate of education and girls' rights, Malala Yousafzai.

A Special Thank You…

The University wishes to thank the Government of the Republic of Trinidad and Tobago and the following organisations and individuals whose efforts were important in ensuring the overall success of this historic visit:
