

# Object Oriented Database Processing

**Instructor:** Rodney Rambally (Dr)  
**Class Schedule:** Mondays & Wednesdays 3 – 6 pm  
**Credits:** 1 credit  
**Location:**  
**E-mail:** [rodney.rambally@utt.edu.tt](mailto:rodney.rambally@utt.edu.tt)  
**Course URL:** [www.u.tt/ict](http://www.u.tt/ict)

## **Description:**

After a very brief review of objects, the lectures in this course concentrate on the development of an object oriented database. A main project deals with the conversion of a relational database to an object relational database. It is assumed that participants are familiar with the tenets of object oriented programming, the development of relational databases, SQL and Oracle's PL/SQL.

## **Evaluation:**

The evaluation in this course consists of a project in which the participant converts a set of relational tables to an equivalent set of object oriented tables along with appropriate methods.

## **Course Materials:**

Participants will be directed to materials which are available on the internet.
