# The Government Assistance for Tuition Expenses Programme (GATE)

The Government Assistance for Tuition Expenses Programme (GATE) is administered by the Ministry of Education of the Government of the Republic of Trinidad and Tobago. The objectives of the GATE programme are:

- To make tertiary education affordable to all so that no citizen of Trinidad and Tobago will be denied tertiary education because of their inability to pay.
- To widen access to tertiary education that will support economic development and promote social equity.
- To build and strengthen a national quality tertiary education sector through both public and private tertiary level institutions.

On November 13<sup>th</sup> 2020, the Ministry of Education issued a [press release](#) announcing amendments to the disbursement of GATE funding, as follows:

Effective August 2020:

- **All applications for GATE funding will include a mandatory means test - failure to complete the means test will disqualify the application from being considered for GATE funding.**
  - Where the household income is below TT \$10,000 per month, students will be eligible for 100% GATE funding for tuition fees.
  - Where the household income is above TT \$10,000 per month but less than TT \$30,000 per month, students will be eligible for 75% GATE funding for tuition fees.
  - Where the household income is above TT \$30,000 per month but less than TT \$75,000 per month, students will be eligible for 50% GATE funding for tuition fees.
  - Where the household income is above TT \$75,000 per month, students will be ineligible for GATE funding.

With immediate effect:

- **Funding under the GATE Programme will be provided for no more than one (1) programme up to the undergraduate level.**
- **Funding for postgraduate programmes will be discontinued.**

Citizens are asked to note that:

- **Students currently enrolled in postgraduate programmes will receive GATE funding until August 2021.**
- **Students currently enrolled in undergraduate programmes will continue to be funded for the normal duration of the programme.**
- **Students who are already in possession of undergraduate or postgraduate qualifications, regardless of whether or not they were beneficiaries of the GATE Programme, will not be able to access funding for any other programme.**
- **The HELP Loan remains available for Tertiary students through the partnership of the Government with commercial banks.**

# UTT's Tuition Payment Plan

Payment of all tuition and auxiliary (miscellaneous) fees become an obligation when students enrol and register for programmes at UTT. The University offers the Tuition Payment Plan (TPP) as an alternative to paying the tuition fees in full at the start of each academic year, allowing students to pay their tuition in installments in accordance with a set schedule.

All UTT students who are registered and have their accounts in good standing are eligible to apply for the TPP.

The plan is administered on a semester-by-semester basis with all tuition fees being paid in three (3) installments on or before the payment deadlines. It is the student's responsibility to monitor their accounts and ensure that their payments are made in accordance with the schedule.

The schedule for payment is as follows:

INSTALLMENTS	SEMESTER 1	SEMESTER 2
First Installment	1/3 of tuition due on last working day of August	1/3 of tuition due on last working day of January
Second Installment	1/3 of tuition due on last working day of September	1/3 of tuition due on last working day of February
Third Installment	1/3 of tuition due on last working day of October	1/3 of tuition due on last working day of March

Additionally, there is a \$75.00 non-refundable service fee due each semester.

Payments can be made via:

- [UTT's Online Payment Facility](#)
- **Direct deposit** or **electronic bank transfer** to UTT's bank account (FCB, a/c #150-1631)
- **Wire Transfer**
- **Certified Manager's Cheques** payable to **The University of Trinidad and Tobago**

Late payments will be subject to a fee as determined by the University and restrictions may be enforced for each late payment or any payment that does not cover the full installment. Full payment of any previous balance is due prior to registration at the start of the semester. Any student with an outstanding balance will not be allowed to participate in registration of courses for a future semester until the account is paid in full. The University has the right to take action to collect the balance, including but not limited to the following:

- Prohibiting a student from enrolling in classes in the following semester.
- Withholding courses credit, course grades, academic transcript and graduation certificate until the balance is paid.
- Taking legal action to collect the balance due.

# Auxiliary Fees

In addition to the fees outlined in this document, compulsory fees required at the time of enrolment are as follows:

<b>COMPULSORY FEES</b>	
Administrative fee	TT \$250
Insurance fee	TT \$75
Guild fee	TT \$175
Amenities fee	TT \$100

Non-compulsory (miscellaneous) fees are as follows:

<b>NON-COMPULSORY FEES</b>	
Late Registration Fee	TT \$200
Missed Exam (Alternate arrangements for sitting exam after formal date)	TT \$ 250
Course Exemption Fee (Subject to approval)	TT \$200
Exam Query	TT \$50
Student ID (Replacement)	TT \$25
Locker Rental	TT \$10
Student Letter	TT \$30
Student Transcript	TT \$55 (Local)
	TT \$135 (International)
Late Payment Fee (Tuition Payment Plan)	TT \$50
Service Fee (Tuition Payment Plan, Withdrawal refund processing fee)	TT \$75
Graduation Gown Rental	TT \$200
Graduation Gown Deposit (Refundable)	TT \$300

Students pursuing programmes at UTT's ECIAF and Chaguaramas Campuses are also subject to the following non-compulsory (miscellaneous) fees:

<b>UTT ECIAF CAMPUS</b>		<b>UTT CHAGUARAMAS CAMPUS</b>	
Dormitory (per semester)	TT \$3,500 <i>Double Occupancy</i>	Dormitory (per semester)	TT \$4,250 <i>Houses up to five persons</i>
	TT \$5,000 <i>Single Room</i>		TT \$8,500 <i>Single Room</i>
Caution Fee (Refundable, per semester)	TT \$500	Caution Fee (Refundable, per semester)	TT \$1,500
Field Trip	TT \$1,500	Short-term Rental (per night)	TT \$700

# Disclaimer

The University of Trinidad and Tobago (UTT) will endeavour to deliver its programmes, research opportunities, services and facilities in a manner consistent with what is presented on the University's website [www.u.tt](http://www.u.tt). The University will provide students with the tuition, learning support and other services and facilities with reasonable care and skill. UTT reserves the right to:

- Alter the academic calendar, location, number of classes and method of delivery of programmes of study, provided such alterations are reasonable.
- Revise its tuitions fees and/or any part thereof as and when necessary.
- Make reasonable variations to the content and syllabus of programmes of study (including in relation to placements).
- Suspend or discontinue programmes of study if it reasonably considers it necessary to do so, for reasons including but not limited to insufficient intake, the unavailability of Faculty or other resource constraints.
- Make changes to its statutes, ordinances, regulations, policies and procedures which the University reasonably considers necessary (for example, in the light of changes in the law or the requirements of the University's regulations). Such changes, if significant, will normally come into force at the beginning of the following academic year, and if fundamental to the programme will normally come into force with effect from the next cohort of students.
- Provide programmes of study or to combine them with others if the University reasonably considers this to be necessary (for example, because too few students apply to join the programme for it to be viable).

In the unlikely event that the University discontinues or does not provide a programme of study or changes it significantly before it begins:

- The University will make all reasonable efforts to advise of same in writing no later than at least two weeks prior to the previously scheduled start of the programme.
- An individual will be entitled to withdraw his or her application by telling the University in writing within a reasonable time of being informed of the change.
- The University will make an appropriate refund of tuition fees and deposits paid.

The University will make available to students such learning support and other services and facilities as it considers appropriate, but may vary what it provides from time to time (for example, the University may consider it desirable to change the way it provides library or IT support).

Upon acceptance by an applicant of an offer of a place at the University, the relationship between the applicant and the University becomes contractual.

There may be occasions when the University's website and social media presence may also include links to other third party websites. These links are used to provide further information and are not intended to signify that the University endorses such websites and/or their content. The University takes no responsibility for any loss or damage suffered as a result of using the linked websites or as a result of using the information published on any of the pages of the linked websites.

Whilst every effort is made to ensure downloadable content is free from viruses, the University will not accept any liability for damages resulting from virus infection.

**CERTIFICATES**

Certificate in

# Agriculture and Agro-processing Technologies

The Certificate in Agriculture and Agro-Processing Technologies is designed to train persons in practical technology-based training with the requisite knowledge to understand, modify and utilise emerging technologies. The next generation of agriculture and food practitioners should be able to optimise technology to their production environment in order to enhance productivity, reduce food wastage while maintaining or improving the state of our natural resources – all in an effort to ensure food security.

**i** GATE approval is Pending for this programme **i**

Certificate in

# Applied Engineering

The Certificate in Applied Engineering is designed for persons who are interested in qualifying for entry into the UTT engineering diploma programmes. It is intended to provide secondary school students who do not have a full CSEC (CXC O' Level) or GCE O' Levels certificate, persons who hold a full craft or pre-technician certificate and mature students, an entry route to embark upon a career in engineering. It is also a terminal qualification, for those who do not wish to continue for the Diploma.

## PROGRAMME DURATION

1 year, Full-time; 2 years Part-time

All US\$ fees are quoted at a rate of US\$1 to TT\$6.6

# Certificate in Aviation Technology

The Certificate in Aviation Technology is designed for new persons who wish to enter the aviation industry, primarily in the area of aircraft maintenance and support services, ground handling and ground support as well as airport ancillary operations. This certificate is also designed to provide a platform for students to articulate into higher-level aviation programmes including Diplomas and Bachelor degrees in Aircraft Maintenance and Management.

## PROGRAMME DURATION

1 year, Full-time; 2 years Part-time

## NUMBER OF CREDITS

Certificate in

## Food Technology

The Certificate in Food Technology was designed for persons wanting to pursue careers in the food and beverage industry. Graduates will have the ability to engage in entrepreneurial activities or enter the industry being “work-ready”, highly motivated and have the knowledge base and skills relevant to the industry. New and existing employees of the food and beverage industry can acquire the technical and practical knowledge and skills for food processing, food safety and good manufacturing practices at the entry level. The programme aims to contribute to the achievement of food security and food safety in Trinidad and Tobago by focusing on the use and processing of local produce for value-added products, strengthening food and beverage organizations and their human capacity.

Certificate in

# Process Operations

The Certificate in Process Operations is designed to meet the present and future demand for Process Operators in the industrial and manufacturing sector. The concept of training in Process Operations encompasses the safe, sustainable and efficient operation of mass production systems that change or transform raw materials into useful, higher valued products.

**PROGRAMME DURATION**

**DIPLOMAS**

## Diploma in **Agriculture**

The Diploma in Agriculture is geared towards providing sound theoretical and practical training in Animal Production, Crop Production, Agro-processing, Soil Science, Farm Business Management and many more. With its strong practical components integrated into most theoretical elements, students gain real-world experiences and practical skills through farm-laboratory exercises and visits to observe commercial farm operations.

Diploma in

## **Animal Health, Production and Veterinary Public Health**

The Diploma in Animal Health, Production and Veterinary Public Health brings in a new philosophy of training that seeks to embody the entrepreneurial dimension and focuses on training in the three aforementioned core areas. Graduates of this programme are “work ready individuals” who are rapidly employed in the monitoring of animal health in the ruminant and poultry sector.

Diploma in

# Computer, Network and Telecommunication Engineering

The Diploma in Computer, Network and Telecommunication Engineering aims to produce graduates who are industry ready and capable of evolving with the changes in information and communication technologies. Students learn best practices in Installation, Configuration and Maintenance of Communication Networks and Computer devices. Graduates may be eligible for direct access to any of UTT's engineering bachelor degrees.

Diploma in

# Food Technology

The Diploma in Food Technology was designed for persons interested in pursuing an applied and career-oriented qualification to enable them to successfully engage in entrepreneurial activities or enter the job market. With its strong practical components integrated into most theoretical elements and its internship (work-based learning) programme, students gain real-world experiences leading to “work-ready” and highly skilled graduates. This programme aims to promote Trinidad and Tobago’s diversification thrust by building and strengthening core competencies in the food processing and manufacturing industry at the technician level to service the food and beverage sector which employs over 11,000 persons. Its focus will position or improve the level of innovation in the industry, diagnostic, food analysis and food safety capability and maintain high-quality standards while linking primary production to secondary processing in the creation of value-added products

# Diploma in Maritime Operations

## Maritime Operations – Engineering

The Diploma in Maritime Operations – Engineering seeks to provide candidates with the required qualifications and training to be awarded the UK Maritime and Coast Guard Agency (MCA) certificate ‘STCW UNDERPINNING KNOWLEDGE’. Following the completion of additional STCW short courses, sea training, simulator training and passing the International Association of Maritime Institutions (IAMI) written examinations and the MCA oral examination, the candidate will be eligible to the award of a first Certificate of Competency as an Engineering Officer of the Watch (EOOW) in the merchant navy.

## Maritime Operations – Navigation

The Diploma in Maritime Operations – Navigation provides current and prospective seafarers with the level of competence that enables them to carry out their duties safely and effectively. The current requirements are detailed in the *IMO Standard of Training, Certification and Watch keeping, 1978, as amended (Manila Amendments) (2010)*, commonly referred to as STCW Code. Successful completion of this and the subsequent Professional Officer of the Watch (Deck) programme will permit students to sit the Professional Officer of the Watch Navigation written and oral examination conducted by the MCA.

Both options will form the basis of study for progression to degree level studies, such as UTT’s Bachelor of Science in Nautical Science/Maritime Operations.

Diploma in

# Ornamental Horticulture

The Diploma in Ornamental Horticulture is designed to bridge the gap in the Ornamental Horticulture industry, between professionals and labour, by preparing graduates to enter as paraprofessionals at the middle management/supervisory level. Areas of study will include Landscaping, Nursery Production and Management, Floriculture and Urban Forestry. It is designed to bridge the gap in the Ornamental Horticulture industry, between professionals and labour by preparing graduates to enter as paraprofessionals at the middle management/ supervisory level.

# Diploma in Security and Public Safety

The Diploma in Security and Public Safety builds on the Certificate in Security and Public Safety by providing advanced and specialised practical and tactical knowledge in supervising and managing security and public safety affairs as well as designing and implementing appropriate interventions. It provides an opportunity for persons to be trained before they enter the security industry while accommodating those who are already on the job. Additionally, it seeks to provide some standardisation and appropriate certification in the private security industry

National Engineering Technician Diploma in

# Instrumentation Engineering

The National Engineering Technician Diploma in Instrumentation Engineering provides students with sound theoretical and practical training in the operation and maintenance of automated process control and measurement systems used in the production of various commodities. Instrumentation Technicians test, certify, install, repair, inspect, maintain, and help to develop complex instruments that measure and record changes in industrial environments. The process-controlled systems operated by these technicians are central to the operation of such facilities as chemical plants, canneries, food processing plants, petroleum refineries, and power plants.

National Engineering Technician Diploma in

# Renewable Energy Engineering Technology

The National Engineering Technician Diploma in Renewable Energy Engineering Technology is designed to produce practical, industry ready and globally competitive Renewable Energy Engineering Technicians who would directly contribute towards the sustainable development and use of the indigenous renewable sources of energy in Trinidad and Tobago and the region. It makes use of state-of-the-art equipment and technology, industry base software and local, regional and international standards and best practise to develop the technical competencies of students.

# **BACHELOR DEGREES**

## Bachelor of Applied Science in **Civil Engineering Systems**

The University of Trinidad and Tobago believes the important activities in the 21st century will include sustaining our environment and the natural cycles on which all life depends; an increased contribution by civil engineers towards the generation of wealth through entrepreneurial activities and providing the necessities for human life and civil societies, including energy, shelter, water and the infrastructure for commerce in more efficient and renewable ways. Our Bachelor of Applied Science degree in Civil Engineering Systems is a full honours engineering programme that prepares students to meet these challenges both locally and internationally.

Bachelor of Applied Science in

# Criminology and Public Safety

The Bachelor of Applied Science in Criminology and Public Safety aims to deal with the expansive, complex and specialised nature of crime and criminality. As communities expand, as the industrial sector grows, and as public concerns over safety become more intense, there is a need to improve the relevant skills in the security industry and in law enforcement. The main focus of a traditional Criminology programme is the scientific study of the nature, extent, causes, and control of criminal behaviour in the individual and in society. However, this programme offers a wide range of practical content and skills that are industry-driven. The Public Safety component offers a mixture of theory and practice, which deals with the prevention of and protection from events that could endanger the safety of the general public – quite important issues affecting Trinidad and Tobago and the wider Caribbean today.

# Bachelor of Applied Science in Energy Engineering

The Bachelor of Applied Science in Energy Engineering is designed to deliver the Energy Engineer best suited to adapt to the ongoing global Energy Transition. Graduates in Energy Engineering will have the unique capacity to pivot between the oil and gas and renewable energy industries. These graduates will be able to function as both Oil and Gas Energy Engineers and Renewable Energy Engineers and will be able to integrate the experience of traditional oil and gas companies as they transition to “Net Zero Carbon” in their operations.

**i GATE approval is Pending for this programme i**

Bachelor of Fine Arts in

# Digital Media Arts

The Bachelor of Fine Arts (BFA) in Digital Media Arts has been developed for students with a passion for Animation, Music Technology or Game Art who want a hands-on, industry-oriented programme, supported by a curriculum that is geared toward the international industry, values our national and regional cultural context and has a strong practical emphasis. It will provide a pathway to new opportunities and encourage students to acquire critical skills locally.

The students of the programme will be equipped to independently perform idea development, design, execute, produce, and complete the delivery of complex media projects for local and global mass media, utilizing industry standard practices and procedures.

## PROGRAMME DURATION

4 years Full-time; Part-time under special circumstances

Bachelor of Science in

# Aeronautical and Airworthiness Engineering

The Bachelor Science in Aeronautical and Airworthiness Engineering offers two (2) technical areas of specialisation in fixed and rotary wing technologies: Airframe and Powerplant (Mechanical), and Avionics Engineering. A key element of the programme construct is the inclusion of engineering courses grounded in mathematics, science, and design as well as ethical and environmental conscientiousness. It includes aeronautical engineering courses in structural design, materials selection, flight mechanics modelling, aircraft performance, stability and control, simulation, automation and testing of aircraft and/or components for return to service.

Bachelor of Science in

# Agriculture and Entrepreneurship

The Bachelor of Science in Agriculture and Entrepreneurship specialises in four areas, namely Crop Science, Animal Science, Agro-processing and Agricultural Biotechnology. Students may also choose to complete a General option. The net effect of the programme would be to effect social change by building human capital and ultimately creating a more prosperous and transformed agricultural community.

Bachelor of Science in

# Aircraft Maintenance and Management

The Bachelor Science in Aircraft Maintenance and Management includes a full syllabus of Trinidad and Tobago Civil Aviation Authority (TTCAA) AMEL content in either Airframe and Power plant or Avionics Modules both Fixed and Rotary wing. This programme is designed to meet the requirements of the BCAR Section L as well as being aligned with the EASA/JAR 66 Syllabi Modules.

Candidates successfully completing this programme will therefore be equipped with the requisite knowledge and competencies that will enhance their abilities as aircraft engineers, supervisors and middle managers. They will also be uniquely positioned to further their development with postgraduate studies.

Bachelor of Science in

# Coastal and Ocean Management

The Bachelor Science in Coastal and Ocean Management emphasises the value of research to students' achievement of academic excellence as well as its contribution to the development of marine resource management strategies and policy. It aims to mirror world standards by ensuring students receive continuous quality education, while emphasising the connection between the marine environment and sustainable marine resource management to ensure a stable economy with an emphasis on healthy ecosystems, sustainable tourism and food security.

Bachelor of Science in

# Food Science and Technology

The Bachelor of Science in Food Science and Technology was designed for persons interested in pursuing a career-oriented qualification featuring industry referenced knowledge and skills to allow them to successfully engage in food-processing entrepreneurial activities or enter the food and beverage manufacturing job market. The programme aims to promote initiative, solutions and responsibility to respond to food sustainability and security needs, a matter of local and global interest. The curriculum features a range of industry-relevant courses in food safety, food processing, labelling and packaging requirements, product development and application of knowledge through an internship (work-based learning), scientific research methods and practice. Our keenly developed “work-ready” graduates will be employable at the managerial and supervisory levels, entrepreneurial or eligible for further study through developed capacity in research areas such as raw material substitution, production, processing and creation of value-added products.

Bachelor of Science in

# Kinesiology

The Bachelor of Science in Kinesiology ensures that students can gain the expertise to prepare for new and exciting career paths in sport and its allied fields. The programme also offers an opportunity to gain expertise in the scientific approach to the preparation and management of athletes and active individuals. Additionally, the programme makes a strong connection between sport and the community, and charts an authentic course for using sport as a tool for personal and social development and entrepreneurship.
